

“**VEBA GO SIZE ZERO...**”

Ultra slim roof mount with innovative footprint Fitment

AV102RMT - 10.2" Roof Mount DVD Player

VEBA have followed in the footsteps of those super slim models, releasing an ultra thin, roof mount DVD system that is ideal for vehicles where space is at a premium.

The 10.2" TFT LCD roof mount monitor comes in a high resolution, 16:9 widescreen format and has a built in IR transmitter for connection with wireless headphones and an FM modulator for radio functions.

The unit has a unique low profile footprint design, minimising the space required to mount the monitor and offering 0 -180° screen rotation. It has a built in side load multimedia player, allowing for easy operation when on the move. It also has an interior light, plus an AV input and an AV output that allow connection to external devices.

The monitor is finished in soft plastic, allowing it to fit in with most OEM vehicle interiors and comes with a child friendly remote control and built in shock resistance for addition safety.
