

“HEAD FOR THE FUTURE”

The latest release in VEBA's exciting new head unit range

AVDIN2828 AM/FM RDS HEAD UNIT WITH DVD PLAYER

The latest from the innovative VEBA range is the outstanding AVDIN2828 am/fm RDS, DVD head unit. Beneath a stylishly simple silver and black face and clear graphic display lies a stunning array of features that will appeal to I.C.E users across all markets.

Ready to hook up to most systems, the 2828 features DVD, CD, MP3 and MP4 playback and an AV input/output that allows the user to link up games consoles and CD/DVD auto-changers, meaning you'll never again have to be without the comforts of home entertainment just because you're on the road.

And as if that's not enough, a USB port, AUX input jack and MMC/SD card slot mean that it's possible to hook up and integrate even more external devices, such as digital MP3 players and memory sticks.

The 2828 unit has a 4 x 35w output, 18 FM/AM radio presets and also comes with a remote control allowing you to concentrate on driving while your passengers take control – a must for all those backseat DJs out there and a feature that really comes into its own when you've jumped into the back of your car, camper or caravan to watch a DVD, play games or just chill out and listen to some tunes.
